

CONDENSATOR

2.0

Pump Repair and Upgrade Kits

Barnes & Jones[®]
INC.

Repair any system pressure operated pump in minutes with a Condensator 2.0 Repair Kit from Barnes & Jones.

Designed for fast, economical field installation, Barnes & Jones' Condensator 2.0 repair kits deliver more reliable performance and a longer service life than nearly every other manufacturer's original mechanism. Condensator 2.0 repair kits are available for most pump models by Spirax-Sarco, Johnson, Armstrong, TLV, Yarway, Dunham Bush/MEPCO, ITT Domsetic Pump, Getsra, Watson McDaniel, Spence, Nicholson, Clark Reliance, Shipco, and Bestobell.

Features

- **Simple Installation** - Just remove the piping, unbolt and discard the old flange holding the worn out float mechanism and bolt on the Condensator 2.0 upgrade.
- **Longer Operating Life** - Rugged design, dual open coil springs, two piece stem and ball inlet valve, and regulated motive extend mechanism life.
- **Lower Operating Costs** - Reduced maintenance equates to lower operating cost, and increased up-time returns more condensate to the boiler.

Specifications

PMA (Max Allowable Pressure)	150psig
PMO (Max Motive Pressure)	90 psid
Max Temperature	450°F
Service	steam, condensate, water
Tank Flange	cast iron, accomodates original piping configuration
Float	Stainless, reinforced
Pivot Pins	Stainless, large diameter
Springs	300 Series Stainless, open coil design with built-in tension gauge eliminates corrosion and breakage due to work hardening
