- Rugged Stainless Steel Components
- Made In USA
- Available for over 1,000 Models of Steam Traps
- One-Piece Design for Ease of Installation.
- Factory Calibrated and Tested
- Over 100 Years Repairing Millions of Steam Traps

Description

The Cage Unit comprises all working parts of a thermostatic steam trap including the element, plug and seat. All working parts are factory calibrated and tested under actual steam conditions.

One-piece design allows for ease of installation and removal for testing the element outside of the trap body.

Available to repair over 1,000 different models and makes of thermostatic steam traps. Refer to the Steam Trap Selection Guide to find a Cage Unit specifically designed to repair any make of thermostatic steam trap.

(A) Type Cage Unit

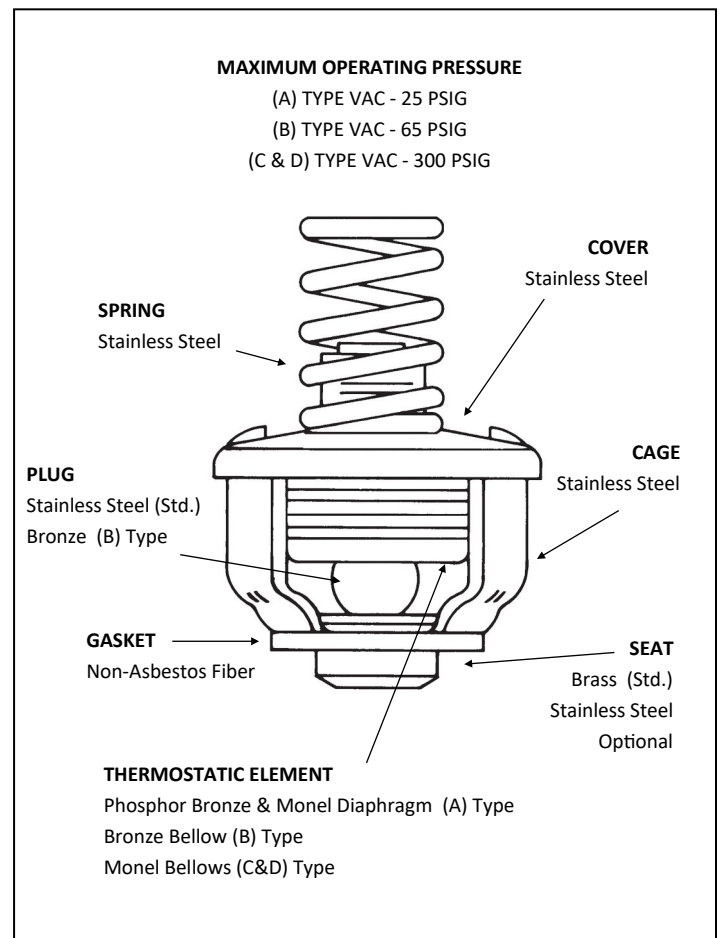

Super Trap Cage Unit

Air Vents
